ABOUT

In Search of Incredible

ASUS is a multinational company known for the world's best motherboards, PCs, monitors, graphics cards, routers and servers, and is ranked by Laptop Mag as the best laptop brand in 2020. Along with an expanding range of superior gaming, content-creation and AIoT solutions, ASUS leads the industry through cutting-edge design and innovations made to create the most ubiquitous, intelligent, heartfelt and joyful smart life for everyone. With a global workforce that includes more than 5,000 R&D professionals, ASUS is driven to become the world's most admired innovative leading technology enterprise. Inspired by the In Search of Incredible brand spirit, ASUS won more than 11 awards every day in 2020 and ranks as one of Forbes' World's Best Regarded Companies and Fortune's World's Most Admired Companies.

Why ASUS Mini PCs and Chromboxes

Simply – we're a trusted, world-class brand with an enviable reputation for performance, quality and reliability. In slightly more detail, we have over a quarter of a century's experience of building high-quality servers and workstations. The core values of ASUS servers and workstations are to deliver exceptional performance, green computing and easy management to ensure the perfect mix of solutions for customer success.

Achieved over 900+ world-record benchmarks with SPEC CPU, and still growing

Ranked Top 20 on the TOP500 list of the world's most powerful supercomputers and Top 10 on the Green500 list in 2018 by supporting TAIWANIA 2

Ranked No.1 on the Green500 list of energy-efficient supercomputers in 2014

Powerful solutions created with humanity in mind

To us, creating the incredible goes far beyond technology. We strive to be a world-leading high-tech company in building a better world. That's why we integrate Corporate Social Responsibility into every business decision we make – and set measurable, meaningful goals in the pursuit of an incredible tomorrow.

Our 2025 sustainability goals

Circular Economy

3 GOOD HEALTH AND WELL-BEING

8 DECENT WORK AND ECONOMIC GROWTH

12 RESPONSIBLE CONSUMPTION AND PRODUCTION

- Promote sustainable procurement and increase the use of environmentally friendly materials in products and packaging by **100%**.

Climate Action

7 AFFORDABLE AND CLEAN ENERGY

13 CLIMATE ACTION

- Use **100%** renewable energy in Taiwan-based operations centers by 2030, and in global operations centers by 2035
- Ensure that key suppliers achieve a **30%** reduction in carbon intensity rates by 2025
- Key products demonstrate 30% energy-efficiency above the Energy-Star standard

Responsible Manufacturing

3 GOOD HEALTH AND WELL-BEING

8 DECENT WORK AND ECONOMIC GROWTH

12 RESPONSIBLE CONSUMPTION AND PRODUCTION

17 PARTNERSHIPS FOR THE GOALS

- Achieve labor and human rights goals by completing **100%** of RBA third-party audits of key suppliers and ensure that any necessary corrective actions are taken
- Use responsible minerals by sourcing **100%** of tantalum, tin, tungsten, gold, and cobalt from qualified smelters

Value Creation

4 QUALITY EDUCATION

8 DECENT WORK AND ECONOMIC GROWTH

9 INDUSTRY, INNOVATION AND INFRASTRUCTURE

- Intensify digital transformation and innovation efforts with the goal of a **100%** increase in sustainable value creation
- Strengthen cooperation with industry and academia to cultivate talents

ASUS Mini PCs

Powerful, Compact and Versatile Solutions for Business and Professionals

Recognized for Quality

Each award is a testament to our relentless quest for perfection as we create technology that enhances the lives of people.

Exceptional Design

ASUS is committed to pursuing the ultimate aesthetic design and creating products that are both beauty and function. For Example, the functionality with a rubbed design and beveled surface elegantly concealing the PN series heat dissipation holes, which are needed to provide greater stability to accommodate the device's increased computing performance.

Precision Manufacturing Yield Better Products

ASUS products are engineered to exacting standards to guarantee quality, with only the best components used to ensure outstanding real-world performance and reliability.

Compact but Powerful

ASUS Mini PC is ready to handle even the most demanding workloads. Its compact, less-than-3-liter chassis takes up minimal space on a desk or workstation, making it well-suited for small and medium-sized businesses, retail settings, educational institutions, small offices, or homes.

Comprehensive Connectivity

ASUS Mini PC provides comprehensive connectivity with multiple ports, including a configurable port* to support additional displays or multiple network connections. Such versatility makes ASUS Mini PC perfect for a wide range of commercial scenarios.

* Configurable port options may vary by model or region.

Easy Upgrades and Maintenance

ASUS Mini PC can be easily disassembled to enable upgrades, to customize storage, or to add memory or a WLAN card.

Stability and Reliability

ASUS Mini PCs undergo rigorous noise, vibration, drop and thermal-shock tests to ensure reliability in extreme conditions for extended periods, ranging from dry 0° C temperatures to humid and hot environments exceeding 50° C.

Eco-Friendly Design

ASUS Mini PCs are recipients of some of the industry's highest environmental certifications, including ePEAT Gold award and ENERGY STAR®. ASUS also exceeds legal compliance guidelines to protect customers, employees, and the environment.

Longevity and Manageability

ASUS Control Center (ACC) for Enterprise is an excellent centralized management tool for servers and client devices. It's minimize administration and maximize uptime.

ASUS INNOVATIONS ON MINI PC SOFTWARE

ASUS Control Center

ASUS Control Center (ACC) for Enterprise is an excellent centralized management tool for servers and client devices. It is tailored for efficient IT management, including both hardware- and software-inventory management, and the remote dispatch of both software and firmware updates. It also allows for simple remote device configurations and health checks, plus rapid deployment of latest security policies and patches. In short, ACC Enterprise is a one-stop portal for IT management, and has been embraced by industries and businesses globally to minimize administration and maximize uptime.

Industry

Professional

Performance

Essential

Expert Center PN Series

- Available on Intel & AMD platforms, lining-up from essential to professional usage
- Chassis design for easy assembling
- Comprehensive IO ports for various scenarios
- Multiple form factors for choice: powerful 2.5L with adapter inside, or <1L ultra small size also with DT grade performance

PB Series

- Compact size metal chassis, plus vertical stand and VESA
- Comprehensive and flexible I/O ports for various uses

ASUS-Google Meet Hardware Kit

The latest smart one-touch video-conferencing solution

PL Series Industrial PC

Reliable durability and high performance ensured with metal chassis

Chromebox Series

- Seamless and modern employee experience with built-in security, quick deployment, and automatic update features
- Android apps available for productivity, communication, entertainment and more

CF Series (Fan-less Chromebox)

- Fan-less design ensure stable thermal performance
- Legacy port support, built for diverse commercial applications

ASUS Expert Center PN Series

Easy modification Maximum possibilities

- **Sliding chassis design** - Easy, two-step storage and memory upgrades.
- **Ultracompact** - Saves space and blends into any environment.
- **Flexible connectivity*** - From dual displays to legacy devices.
- **24/7 reliability** - Extensively tested to ensure long-term reliability.
- **Military Grade (MIL STD-810H tested)**
- **EPEAT Gold/Silver**
- **Configurable Port for different scenarios**
- **Energy Star 8.0 certified**

* I/O port options may vary by model or region

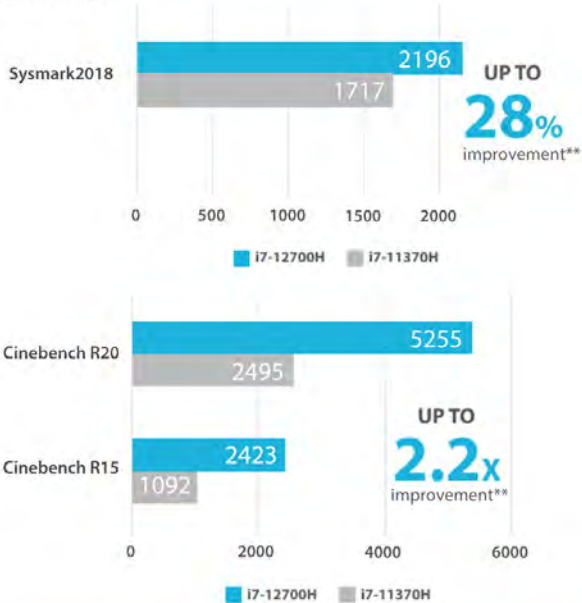

ExpertCenter PN64

Ultra-compact mini PC with 12th Gen Intel® Core™ processors and Intel® Iris® Xe Graphics*, up to 64 GB DDR5 RAM, PCIe® Gen 4 x4 M.2 NVMe® SSD, Intel® 2.5 Gb LAN, WiFi 6E

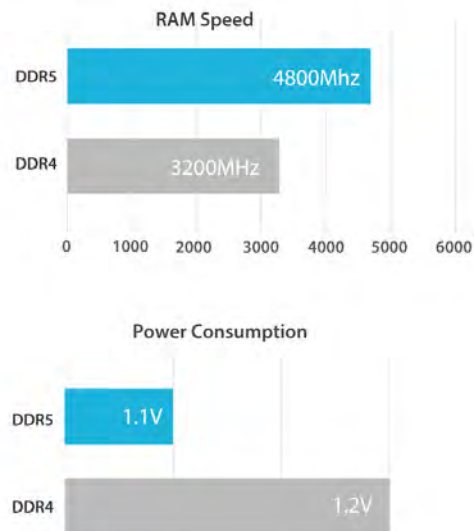

Superior Computing Performance

ASUS ExpertCenter PN64 delivers superior performance, allowing users to get more done effortlessly, with greater efficiency. Compared to the previous generation PN63-S1 model, PN64 offers a 28% boost on overall system performance, making it perfect for multitasking**.

Faster and Better DDR5 RAM

ASUS ExpertCenter PN64 is powered by the new 12th Gen Intel® Core™ CPU supporting the next gen memory - DDR5. With DDR5 4800MHz memory that is 1.5X faster and 8% more energy efficient than DDR4 3200MHz memory, PN64 provides excellent performance for daily computing tasks.

Ultra-realistic 8K Visuals

ASUS ExpertCenter PN64 delivers breathtaking 8K visuals at 30 frames per second via the configurable standard DisplayPort or DisplayPort over USB-C. Experience a level of detail that's 4X greater than 4K, or 16X that of traditional FHD output.

*Test model: SAMSUNG GXA7301Q / SAMSUNG EXD7201
 *Actual performance may vary depending on objective environmental changes.

USB Power Delivery Input

ASUS ExpertCenter PN64 can draw power from any USB Power Delivery-enabled display or device, eliminating the need for a separate power adapter to create a neater, uncluttered workspace.

*Devices need to support at least 20V/4.5A power delivery

4K Resolution & Quad Display Support

ASUS ExpertCenter PN64 can support up to four 4K displays via two HDMI® ports, two DisplayPort™ over USB-C® or other user configurable ports, without any limitation on the combination used.

*Configurable ports are confirmed SKU before configuring.
 *Configurable - VGA ports can not support 4K due to transfer speed limit.
 **High resolution/multi displays requires sufficient memory bandwidth

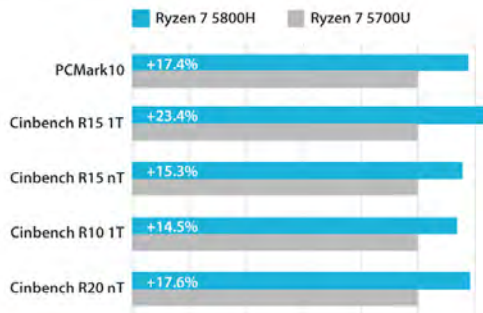

ExpertCenter PN52

Ultra-compact mini PC with AMD Ryzen™ 5000H series processors and AMD Radeon™ Graphics, supports Quad-4K displays and 8K resolution, 2x PCIe® Gen3 x4 M.2 NVMe® SSD, 2.5 Gb LAN, WiFi 6E

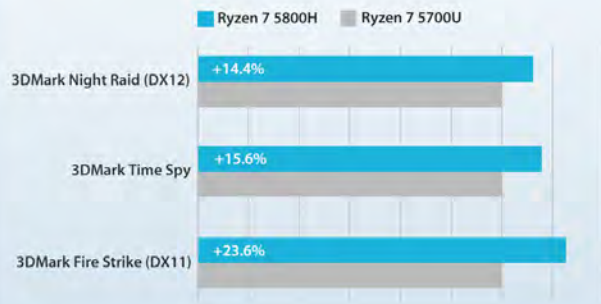

System & CPU Performance

ASUS ExpertCenter PN52 is powered by the latest AMD Ryzen™ 5000H series processor for smooth and powerful multitasking. In PCMark 10 benchmark testing, the Ryzen 5000H delivered a 17.4% boost in overall performance, and up to 23.4% improvement in singlethread computing performance compared to the previous generation processor.

Graphics Performance

ASUS ExpertCenter PN52 gets a significant graphical boost with Radeon™ Graphics to deliver crisp, clear visuals that are way ahead of its class. It delivers a marked improvement, raising its score from 14.4% in 3DMark11 to 23.6% in the 3DMark Night Raid performance benchmarks.

Multi-Storage Design

ASUS ExpertCenter PN52 is able to accommodate two M.2 SSDs and a 2.5-inch HDD, allowing users to specify custom storage solutions for a balance of speed and capacity that best suits their needs.

Military-Grade Durability

ASUS ExpertCenter PN52 is subjected to rigorous MIL-STD-810H durability tests, enduring extreme temperatures and humidity, high altitude, plus drop and vibration tests to ensure it's fit to perform in the harshest conditions.

*MIL-STD-810H standard tests are held in rigorous conditions, the test results cannot ensure the performance under these test conditions or for military use.

ASUS – Google Meet hardware kit

Fast, effective video meetings for the conference room.

ASUS Google Meet hardware kit

Smart, one-touch HD video-conferencing with anyone, anywhere

ASUS Google Meet hardware kit is the smart video-conferencing solution in stunning HD resolution. The package includes ASUS – Google Meet Compute System powered by an up to Intel® Core™ i7 processor, and a 4K UHD camera with a wide 120° field of view — with auto-zoom technology to keep the images focused on the meeting participants. ASUS Google Meet hardware kit also comes with a touchscreen control panel for one-touch meeting management, and a high-quality speakermic box that employs echo-cancellation and noise-suppression technologies to deliver crystal-clear audio. ASUS Google Meet hardware kit improves team efficiency through real-time collaboration, making it the perfect choice for the modern workplace.

Real-time collaboration

Meetings with anyone, anywhere

ASUS Google Meet hardware kit lets you meet with anyone on any device, and from anywhere — all through Google Meet. Whether you're joining from a computer, phone, or conference room, with a lightweight interface and smart participant management, multi-person video calls are a breeze.

Up to 250 online meeting participants supported

Meetings support up to 250 participants, providing collaboration with teammates, customers and clients around the world, just like you're all in the same room.

Simple, reliable access to meetings

Easy one-click URL access

Each meeting has a unique, easily shareable URL – no dedicated accounts or plugins required. Invited parties can also join via a single tap on a Google Calendar entry.

Unique dial-in number and PIN security for every meeting

To make it easy for offline users to take part in the discussion, ASUS Google Meet hardware kit creates a unique dial-in telephone number and PIN for each meeting.

Designed for enterprise

Hassle-free and user-friendly collaboration

It takes just one click to join a video conference, or start one spontaneously via the touchscreen control panel. It's easy to schedule or join a meeting directly from Google Calendar, and participants are able to share screens remotely.

Automatic updates and security

It is easy to set up and updates automatically, so ASUS Google Meet hardware kit always has the latest security fixes to keep itself safe from viruses and other malware. Real-time authorization and central management of meeting participants also ensures conferences are secure.

ASUS FANLESS CHROMEBOX : POWERING DIGITAL SIGNAGE SOLUTIONS AND BEYOND

Digital signage has the power to transform the way people shop and the way companies sell products — through understanding customer interests and providing more interactive, high-impact experiences tailored to those interests.

At these stations, visitors can explore targeted information on the most frequently asked questions. The kiosks also allow visitors to book a test drive from their home or a dealership, request that car information be sent to their mobile phone and use the car configurator to model their preferred car color. The interface of each kiosk is designed to understand visitor requests and interests and to provide insights for car manufacturers. With the powerful hardware support from ASUS Fanless Chromebox and the GDPR-compliant software from StratosMedia, detailed, real-time AI analytics help car companies to determine customer demographics and interests, which can then ensure that visitor experiences are optimized and enjoyable. “We recognized the need to take our product directly to our customers in a friendly and customer-driven interactive experience and to have the ability to capture deep visitor analytics in real time,” said Tristan Kurz, CEO of Conquest Staging. “We are proud to be the first in the world to use the ASUS Fanless Chromebox. The installation and the performance have been very smooth — well above expectations. The partnership of StratosMedia, ASUS and design to production with Conquest Staging has delivered an enormously powerful product.

The outcome :

Following a high level of satisfaction at the digital signage solutions from ASUS and StratosMedia, Conquest Staging is planning to implement the same kiosks and digital signage solutions in other shopping centers. In light of the stages and presentations receiving high traffic volume, the response from car manufacturers has also been positive. The real-time user analytics and other benefits provided by these kiosks are demonstrating a strong return on investment. In the future, ASUS seeks to engage with more verticals in digital signage solutions to expand uptake of ASUS Fanless Chromebox and to continue providing customized customer journeys with incredible product performance. For more information on ASUS Fanless Chromebox,

please visit: <https://www.asus.com/Displays-Desktops/Mini-PCs/Chrome-OS-devices/ASUS-Fanless-Chromebox/>

The problem :

As digital signage becomes more engaging for visitors, the expectations for visitor experiences are increasing. Also, many industries are faced with the need to analyze visitor interests to elevate customer retail experiences.

The solution :

ASUS has collaborated with StratosMedia to provide digital signage solutions powered by ASUS Fanless Chromebox that address these trends, and this partnership has successfully empowered Conquest Staging in creating interactive, customer-driven car discovery stations.

At 1.2 kg, the lightweight ASUS Fanless Chromebox enhances a wide range of applications — including for digital signage, kiosks, warehouses, point-of-sale and wayfinding — and is the first fanless Chromebox with a 10th Generation Intel® processor for excellent performance. The fanless aluminum chassis operates quietly while delivering enhanced reliability, protection against dust and reduced maintenance needs. It also features USB-C® 3.2 Gen 1 and USB 3.2 Type-A ports for ultrafast connections, WiFi 6 connectivity for quick data transfers, up to 16 GB of DDR4-2666 memory and up to 512 GB of M.2 SSD storage. Supported by Google Chrome OS with built-in Google Play, automatic updates ensure that the device always has the latest software and protection to stay safe from viruses, malware and other security issues. Additionally, ASUS Fanless Chromebox has undergone rigorous tests for 24/7 reliability — such as enduring 35-degree heat and 80% humidity for 168 aging hours — to ensure it meets exacting ASUS standards and exceeds industry requirements. The displayed content on kiosks and signage can be easily managed remotely, which provides a convenient way for businesses to update their programs frequently and adapt to market changes. In addition, a lockable VESA mount and an exclusive cable lock enable ASUS Fanless Chromebox to be easily and securely mounted in a variety of locations. The device also supports up to three 4K displays simultaneously for brilliant, sharp visuals and powerful productivity. With the fanless design and superb performance, ASUS Fanless Chromebox powers a variety of applications to unleash maximum business potential.

Mini PCs and Chromeboxes Care

ASUS guarantees quality, service and reliability. That's why we offer an exclusive one-day advanced replacement and return merchandise authorization service – known as 1-Day ARS. In addition to rapid replacement, all ASUS barebone servers, server motherboards and workstations carry a 3-year limited warranty in most territories – with satisfaction guaranteed.

1-Day ARS

ASUS 1-Day ARS allows for convenient return and replacement of defective products (barebone servers, server motherboards and workstations) via system integrators (SI) and value-added resellers (VAR) throughout the United States, Canada within one day.

3-Year Warranty

The ASUS 3-year limited warranty protects all ASUS server products that means barebone servers, server motherboards and workstations are all covered. During the 3-year warranty period ASUS will repair or replace defective components, allowing your business or organization to continue with minimal disruption.

Global Presence

ASUS has a very strong global presence. Our products are recognized throughout the world and are sold in 113 countries through more than 70 branch offices worldwide. ASUS also has more than 1,400 support center across the globe that are ready to assist our customers anytime, anywhere.
